Experiment 2: Design a User Interface Prototype for a Mobile Station Using Figma

Aim: To design a user interface prototype for a mobile station using Figma, considering connectivity, usability, and convenience.
Procedure:

1. Open Figma and create a new design file.
2. Create a mobile screen frame with a suitable smartphone size (e.g., 390 × 844 pixels).
3. Design a home screen with a clean background and user-friendly layout.
4. Add UI elements such as a status bar, network signal indicator, battery level, Wi-Fi, and mobile data icons.
5. Add buttons for calling, messaging, contacts, and internet connectivity.
6. Use different colors, icons, and text styles to improve readability and visual appeal.
7. Create additional screens for the dialer, contacts, and connectivity settings.
8. Connect the screens using Figma's Prototype mode to demonstrate navigation between them.
9. Preview the prototype and verify that the buttons and navigation work correctly.

Output:

Sample reference for the mobile station UI prototype.

Result: A user-friendly mobile station interface prototype was designed in Figma, incorporating cellular connectivity indicators, Wi-Fi, calling, messaging, contacts, and convenient navigation between screens.
